DASHBOARD OVERVIEW- PURPOSE & AIM

OVERVIEW

This dashboard presents key insights on Africa's progress toward **human development, economic growth, and financial sustainability** through interactive visualizations of Sustainable Development Goals (SDGs) data.

PURPOSE

This dashboard is designed to:

- **Track Progress** – Analyze trends in Africa's **economic growth, financial sustainability, and human development** aligned with SDGs.
- **Compare Performance** – Visualize country-level SDG statistics to identify regional disparities and successes.

SDG 1.3.1 Proportion of Population Covered by Social Protection Floors/Systems

SDG 1.3.1: "Proportion of population covered by social protection floors/systems"

- **Focus:** Measures the percentage of a country's population (including vulnerable groups like children, unemployed, elderly, and people with disabilities) that has access to **essential social protection benefits** (e.g., cash transfers, pensions, healthcare, unemployment support).
- **Importance:** Tracks progress toward **SDG Target 1.3**, which aims to implement nationally appropriate social protection systems for all by 2030.
- **Data Sources:** Typically collected through household surveys, government reports, and international databases (e.g., ILO, World Bank).

Why It Matters for Africa?

Many African countries have **low social protection coverage**, leaving millions exposed to economic shocks. Monitoring 1.3.1 helps policymakers:

- Identify gaps in welfare systems.
- Prioritize inclusive policies to reduce poverty.

Trend of Pop. Covered by Social Systems by Year

Social Protection Score by Social Classification

Proportion of Pop. Covered by Social Systems by Country and Gender

Gender ● Female ● Male ● Total

SDG 5.2.2 Proportion of Women In
Managerial Positions

SDG 5.5.2: "Proportion of women in managerial positions"

- **Focus:** Measures the percentage of women in **senior and middle management roles** across all sectors (public and private).
- **Purpose:** Tracks progress toward **SDG Target 5.5**, which aims to ensure women’s full participation and equal leadership opportunities in economic, political, and public life.

Key Details:

- Includes roles like CEOs, legislators, directors, and supervisors.
- Excludes clerical/support jobs to focus on **decision-making power**.
- Data is often sourced from labor surveys, corporate reports, and the **ILO (International Labour Organization)**.

Why It Matters for Africa?

- While progress varies, many African nations still face significant gender gaps in leadership due to:
- Cultural biases and workplace discrimination.
 - Lack of policies supporting women’s career advancement.
 - Limited access to education and mentorship.

Women in Managerial Positions by Country

Trend of Women in Managerial Positions by Year by Year

Country	Sum of Observed Value
Algeria	44.66
Angola	171.00
Benin	82.51
Botswana	451.33
Burkina Faso	199.06
Burundi	93.51
Cameroon	107.00
Comoros	102.82
Egypt	215.97
Equatorial Guinea	72.24
Total	6,636.23

SDG 8.3.1: "Proportion of Informal
Employment in Total Employment, by
Sector & Sex

SDG 8.3.1: "Proportion of informal employment in
total employment, by sector and sex"

Key Details:

- **Linked to: SDG 8 (Decent Work & Economic Growth)**, specifically **Target 8.3** ("Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, and innovation, and encourage the formalization and growth of micro-, small-, and medium-sized enterprises").
- **What It Measures:** The percentage of workers in **informal employment** (unregistered, unprotected jobs lacking social security) across sectors (agriculture, industry, services) and disaggregated by **gender**.
- **Why It Matters:** Informal employment is often unstable, low-paying, and excludes workers from labor rights. Tracking this indicator helps assess progress toward **formalizing economies** and improving working conditions.

Relevance for Africa:

- Africa has one of the **highest rates of informal employment** globally .
- Gender disparities are stark—**women** are overrepresented in informal, vulnerable jobs.
- Policies addressing this issue include **social**

Informal Employment by Gender & Industry by Industry and Gender

Gender ● Sex: Female ● Sex: Male ● Sex: Total

Informal Employment by Country

Informal Employment by Gender

SDG 8.5.2: "Unemployment rate, by sex, age, and persons with disabilities"

- **Focus:** Tracks the **unemployment rate** disaggregated by:
- **Gender** (male vs. female)
- **Age group** (e.g., youth aged 15–24 vs. adults)
- **Persons with disabilities** (highlighting labor market inequalities).
- **Purpose:** Measures progress toward **SDG Target 8.5**, which aims to achieve **full and productive employment** and **decent work for all** by 2030, ensuring no one is left behind.

Why It Matters for Africa?

- Africa faces high **youth unemployment** (often 2–3x the adult rate).
- Gender gaps persist, with women disproportionately affected.
- Data on disabilities is critical for inclusive policy-making.

Average of Unemployment Rate by Gender and Age

Age ● Age (Youth, adults): 15+ ● Age (Youth, adults): ... ● Age (Youth, ad...

Average of Unemployment Rate by Year and Gender

Gender ● Female ● Male ● Sex: Other ● Total

Average_Unemployment by Country

SDG 8.6.1: Proportion of Youth (aged 15–24) Not in Education, Employment, or Training (NEET)

SDG 8.6.1: "Proportion of youth (aged 15–24) not in education, employment, or training (NEET)"

- **Focus:** Measures the percentage of young people who are **excluded from education, employment, or vocational training**—a key metric for youth disengagement and economic vulnerability.
- **Importance:** Tracks progress toward **SDG Target 8.6**, which aims to substantially reduce NEET rates by 2025 (a stepping stone to 2030 goals).
- **Data Sources:** National labor force surveys, UNESCO, World Bank, and ILO databases.

Why It Matters for Africa?

Africa has the **world's youngest population**, yet many countries face alarmingly high NEET rates due to:

- Limited job opportunities.
- Skills mismatches.
- Barriers to education (especially for girls).
- Monitoring 8.6.1 helps governments and NGOs design targeted interventions (e.g., vocational programs, youth employment schemes).

NEET by Country and Gender

Gender ● Sex: Female ● Sex: Male ● Sex: Total

NEET by Gender

NEET by Country

SDG 8.8.1: "Frequency rates of fatal and non-fatal occupational injuries, by sex and migrant status"

- **Focus:** Tracks workplace safety by measuring:
- **Fatal injuries** (deaths due to work-related accidents).
- **Non-fatal injuries** (injuries causing absences or disability).
- Disaggregated by **sex** and **migrant status** to assess disparities.

Purpose: Supports **SDG Target 8.8** – "Protect labour rights and promote safe working environments for all workers" by 2030.

Key Details

- **Data Sources:** National labour surveys, health records, and reports from organizations like the **ILO (International Labour Organization)**.
- **Relevance for Africa:** Many African economies (e.g., mining, agriculture, informal sectors) face high occupational risks. Improving this metric is critical for:
 - Reducing worker vulnerability.
 - Formalizing safer labour practices.

Fatalities by Country and Gender

Number of Fatal Injuries by Country

**SDG 8.8.2: Level of National Compliance With Labour Rights
(freedom of association and collective bargaining) Based on
International Labour Organization (ILO) Textual Sources &
National Legislation**

SDG 8.8.2: "Level of national compliance with labour rights (freedom of association and collective bargaining) based on International Labour Organization (ILO) textual sources and national legislation"

Focus: Measures how well countries **legally guarantee** two key labour rights:

- **Freedom of association** (workers' right to join unions).
- **Collective bargaining** (workers' right to negotiate wages/conditions collectively).

Purpose: Tracks progress toward **SDG Target 8.8**, which aims to protect labour rights and promote safe working environments for all.

Key Details:

- **Data Sources:** ILO assessments of national laws and compliance.
- **Scale:** Scores range from **0 (no compliance)** to **10 (full alignment with ILO standards)**.
- **Relevance for Africa:** Many African economies have informal labour markets, weak enforcement, or restrictive laws. This indicator helps:
 - Highlight gaps in worker protections.
 - Advocate for policy reforms to ensure fair labour practices.

Average of Observed Value by Country

Labour Compliance by Country

SDG 8.10.2: Proportion of Adults (15+ years) With An
Account at a Bank or Other Financial Institution, Or With
a Mobile-money-service Provider

SDG 8.10.2: "Proportion of adults (15+ years) with an
account at a bank or other financial institution, or with
a mobile-money-service provider"

- **Focus:** Measures **financial inclusion**—the percentage of adults who have access to formal financial services (e.g., bank accounts, mobile money).
- **Importance:** Tracks progress toward **SDG Target 8.10**, which aims to strengthen financial institutions for inclusive economic growth.

Key Metrics:

- Traditional banking access.
- Mobile money adoption (critical in regions with limited bank infrastructure).
- **Data Sources:** World Bank’s *Global Findex Database*, national surveys.

Why It Matters for Africa?

Africa leads in **mobile money innovation** (e.g., M-Pesa in Kenya), but disparities persist:

- **Progress:** Countries like Kenya, Ghana, and Uganda have high mobile-money usage.
- **Challenges:** Rural populations, women, and the poor often remain excluded.

% of Population Has Bank Account (Age 15+) by Country

Has a Bank Account (Poorest 40%-Age 15+) by Country

Percentage of Population Owns a Debit Card (Age 15+) by Country

**SDG 9.2.2: "Manufacturing employment as a
proportion of total employment"**

- **Focus:** Measures the percentage of a country's workforce employed in the **manufacturing sector**, reflecting industrialization progress.
- **Purpose:** Tracks progress toward **SDG Target 9.2**, which aims to "*promote inclusive and sustainable industrialization and significantly raise industry's share of employment and GDP*" by 2030.

Key Insights:

- Higher values suggest a stronger industrial base, critical for job creation and economic diversification.
- Low values may indicate reliance on agriculture or services, highlighting gaps in industrial development.

Relevance for Africa

Many African economies struggle with **low industrialization** (manufacturing often <10% of employment). Monitoring 9.2.2 helps:

- Assess policies boosting manufacturing (e.g., *African Continental Free Trade Area*).
- Identify countries needing investment in skills and infrastructure.

**Employment in the Manufacturing Sector by
Country**

Trend of Employment in the Manufacturing Sector by Year

Manufacturing Employment by Country

SDG 9.3.2: "Proportion of small-scale industries with a loan or line of credit"

- **Focus:** Measures the percentage of **small-scale industries** (often informal or micro/small enterprises) that have access to **formal financial services**, such as bank loans or credit lines.
- **Importance:** Tracks progress toward **SDG Target 9.3**, which aims to increase access to financial services for small enterprises in developing countries—key to fostering inclusive industrialization.
- **Data Sources:** Typically collected through enterprise surveys, central bank reports, and World Bank databases (e.g., Global Findex).

Why It Matters for Africa?

Small and medium enterprises (SMEs) drive Africa's economy but often face **limited access to finance**. This indicator helps:

- Assess financial inclusion gaps for businesses.
- Guide policies to support entrepreneurship and job creation.

Country	Average of Value
	34.00
Benin	51.50
Burundi	30.70
Cameroon	7.20
Central African Republic	38.00
Chad	7.20
Egypt	4.20
Ethiopia	32.90
Gambia	6.70
Guinea	8.70
Kenya	36.80
Lesotho	21.20
Total	29.50

Availability of Credit by Year

SDG 10.4.1: "Labour share of GDP"

Under: *SDG 10 (Reduced Inequalities) – Target 10.4: "Adopt policies, especially fiscal, wage, and social protection policies, and progressively achieve greater equality."*

What It Measures:

- The **percentage of a country's GDP** that goes to **workers as wages (labour compensation)** vs. capital (profits, rents).
- **High labour share** → More equitable income distribution, stronger middle class.
- **Low labour share** → Rising inequality, more wealth concentrated among capital owners.
- Critical for tracking **economic fairness** in Africa, where informal economies and wage disparities are prevalent.

Key Insights for Africa:

- Many African economies have **declining labour shares** due to globalization, automation, and weak labour rights.
- Improving this metric requires policies like:
 - Minimum wage adjustments
 - Stronger social protections
 - Formalizing informal jobs

Labour Share as a % of GDP by Country

Trend of Labour Share as a % of GDP by Year

SDG 16.6.1: "Primary Government Expenditure
as a Proportion of Original Approved Budget"

Focus: Measures how closely a government’s **actual spending** aligns with its **initially approved budget** at the national level.

Purpose: Tracks **budget transparency, fiscal discipline, and institutional accountability**—key factors in reducing corruption (SDG Target 16.6: *"Develop effective, accountable, and transparent institutions"*).

- **Ideal Scenario:** A ratio of **100%** means full adherence to the planned budget. Significant deviations may indicate mismanagement or lack of oversight.

Why It Matters for Africa?

- Many African nations struggle with **budget credibility** due to:
- Unplanned spending shifts (e.g., emergency crises, corruption).
 - Weak parliamentary oversight.
 - Lack of public access to budget execution data.
 - Tracking 16.6.1 helps assess governance reforms and trust in public institutions.

Government Expenditures by Country

Trend of Government Expenditures by Year
